

READY MIXED CONCRETE & SCREEDS

Material Safety Datasheet: DQ11 Issue 01/09

Glendinning
CONCRETE PRODUCTS

It is important that you or those working for you familiarise themselves with the information supplied on this Datasheet before handling, using or disposing of the product.

IDENTIFICATION OF SUBSTANCE & COMPANY

Company: E & JW Glendinning Limited
 Glentor
 Ashburton
 Newton Abbot
 TQ13 7LF
 Tel 01364 652601
 Fax 01364 652978

Product: Ready Mixed Concrete,
 Screeds including Speed Screed

Document: DQ11 Issue 01/09

PHYSICAL AND CHEMICAL CHARACTERISTICS

Ready Mixed Concrete and Screeds are a mixture of aggregate, cement and water. Admixtures may be added to improve product handling characteristics or the properties of the hardened concrete. The resultant mixture is abrasive and alkaline.

The principal constituents of cement are calcium silicates, aluminates and sulphates. Small amounts of alkalis, lime and chlorides are also present. Additional constituents may also be present eg limestone, fly ash, granulated blast furnace slag.

HAZARDS

- Cement burn, a form of skin ulceration, may result from contact with freshly mixed concrete or screed.
- Irritant contact dermatitis is caused by the combination of the wetness, alkalinity and abrasiveness of the cement mixture within the product.
- Allergic contact dermatitis mainly caused by individual sensitivity to chromium compounds which may occur in cement. Contact with wet cement mixes such as concrete can cause skin disease.

- The surface treatment and cutting of hardened concrete can create dust which may contain quartz. If inhaled in excessive quantities over extended periods, respirable dust containing quartz can constitute a long term health hazard and may cause the development of silicosis or lung cancer.

EMERGENCY ACTION – FIRST AID

EYE CONTACT

1. Irrigate immediately with copious amounts of clean water. Seek immediate medical attention.

SKIN CONTACT

1. Immediately wash with copious amounts of clean water. Clothing contaminated by wet cement, concrete or screed should be removed and washed thoroughly before use.

INHALATION

1. If irritation occurs move the affected person into fresh air. If irritation or inflammation persists seek medical attention.

INGESTION

1. Wash out mouth and drink plenty of water. Do not induce vomiting. Seek medical advice if large amount is swallowed.

PRECAUTIONS

The following precautions should always be taken:

- Direct skin contact with wet concrete or screeds should be avoided.
- It is also important not to kneel or sit on the wet materials as harmful contact can occur through saturated clothing.
- Inhalation of concrete dust should be avoided.

PROTECTIVE CLOTHING

Protective clothing should be worn when handling wet concrete or screeds, particularly on the arms, hands, legs and feet eg long-sleeved clothing and gloves with full length trousers and impervious boots.

Respiratory protective equipment should be worn during the surface treatment or cutting of hardened concrete where dust is generated.

TRANSPORTATION AND WASTE DISPOSAL

The carriage of concrete or screeds is not subject to hazardous substance conveyance regulations and vehicle labelling is not required. In the event of spillage, entry of material to water courses should be avoided.

Unused hardened concrete or screeds are inert but should be disposed of in accordance with local authority requirements. Keep out of the reach of children.

STORAGE

The hardening of concrete can be delayed, extending the period during which the precautions given above should continue to be taken and during which access by unauthorised person should be prevented.

GUIDANCE

- EH40 – For detailed guidance on workplace exposure levels to constituent substances reference should be made to EH40 (HSE Guidance Note)

NOTES

The purpose of this datasheet is to provide Health, Safety and Environmental guidance on the safe handling, use and disposal of Ready Mixed Concrete or Screed products supplied by E & JW Glendinning Limited. The information contained in this datasheet is correct at the date of writing, and applies only in relation to the supply of material referred to in the delivery docket to which this datasheet is attached and forms part. This datasheet should alert purchasers and/or users to the usual hazards in handling the supplied material when using it within the ordinary range of uses for which such material is normally supplied.

If you have purchased or arranged the supply on behalf of a third party who will work with the material supplied it is your duty to pass this information on to them BEFORE such work commences. For the avoidance of doubt the datasheet DOES NOT constitute the user's own assessment of workplace risk as may be required by other safety legislation and nothing herein shall be construed or relied upon as relieving the purchaser, user or any intermediate supplier or third party from any statutory or other legal duty which may apply to them or from taking care or precautions to protect themselves or others to whom they owe a duty of care.

The datasheet should not be relied upon for any other purpose including without limitation any technical or design purpose, nor relied upon in the use or handling of any other product whether supplied by E & JW Glendinning Limited or not. Reliance placed on any part or all of the information contained in this datasheet which goes beyond the purpose set out above is entirely at the user's own risk.

Without limiting or restricting the terms and conditions upon which the material has been supplied by E & JW Glendinning Limited, to the extent permitted by law, disclaims all liability arising directly or indirectly from the content or preparation of this datasheet except that E & JW Glendinning Limited will accept responsibility for personal injury which is demonstrated to have been caused by its own negligence.
